

Public health—everyone’s business

Working in partnership to improve health and wellbeing

“...if the *nation fails to get serious about prevention* then recent progress in *healthy life expectancies will stall*, health inequalities will widen, and our ability to fund beneficial new treatments will be crowded-out by the need to spend *billions of pounds on wholly avoidable illness.*” NHS 5 Year Forward View.

As **Sustainability Transformation Plans** are developed to narrow the gaps in the quality of care, and the population’s health and wellbeing, **how will they impact the workforce and the skills and training needed?**

Join us on the 9th of June to explore:

- The local Thames Valley population challenges
- Place-based health, and how as a community we can all play our part in preventing ill-health
- How to support our workforce to practically 'do' prevention
- Making sense of MECC (Making Every Contact Count)

Register your attendance via tvstakeholder@thamesvalley.hee.nhs.uk

9.30	Registration
10.00	What is Public Health and why bother with prevention
